Following points were discussed during the meeting.

1. Regarding electives, if it is offered inline with coordination then students will get benefit out of it. Example - If the first elective selected is AI, then next electives in next semesters should inline with the selected elective.
2. Offer internship to half students and project work to half students in the first semester. Reverse the process in the Second Semester.
3. Addition of MOOC courses instead of classroom teaching which will keep students engaged in internship or in projects.
4. Engineering core subjects like Software Engineering, Design and Analysis of Algorithms must remain core in syllabus not as an elective
5. Cloud computing can be elective
6. The programming elective(ML,DL,AI and IOT) should be aligned and offered in synchronization across both semesters. For ex: AI should be elective 1 and DL should be elective 2.
7. They have requested a review of the syllabus content for Software Engineering and Software Project Management to ensure that the topics are not repetitive.
8. Take care of the sequence of learning by students, especially the subject sequence.
 - a. For example, they must learn AI first then Deep Learning.
9. Internships must be offered in the last semester. It increases chances for students to get a pre placement offer.
10. Try to finalize an internship at the end of seventh semester, so that students can start it during the commencement of last semester.
11. In the BoS meeting, the updated POs and PSOs was discussed, and the final POs and PSOs was approved
12. In the BoS meeting, the curriculum equivalence was discussed and Final
